About IDEAYA Biosciences
IDEAYA is an oncology-focused precision medicine company committed to the discovery and development of targeted therapeutics for patient populations selected using molecular diagnostics. Our approach integrates extensive capabilities in identifying and validating translational biomarkers with oral small molecule drug discovery to select patient populations most likely to benefit from our targeted therapies. We are applying these capabilities across three classes of precision medicine including direct targeting of oncogenic pathways, synthetic lethality – which represents an emerging class of precision medicine targets – and immuno-oncology.
